Nodal Exchange Contract Specifications

NODAL EXCHANGE CONTRACT SPECIFICATIONS

PJM 196 KATY34.5 KVTCROPWF Monthly Day Ahead On-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion PJM 196 KATY34.5 KVTCROPWF, Day Ahead
Contract Code	HIW
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of 196 KATY34.5 KVTCROPWF for all On-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 - 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all Off-Peak hours, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of 945 CRET13.5 KVCT-1 for all On-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 - 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all Off-Peak hours, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of AEPAPCO_RESID_AGG for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _FTR, e.g, the congestion components of contracts on JCPL_RESID_AGG would settle against price for JCPL_RESID_AGG_FTR on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	LFO
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of AEPIM_RESID_AGG for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _FTR, e.g, the congestion components of contracts on JCPL_RESID_AGG would settle against price for JCPL_RESID_AGG_FTR on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of 7x8 hours within the month traded. For example, in a month with 248 7x8 hours, the Contract Size equals 248 MWh. The definition of 7x8 hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Sunday through Saturday, EPT.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all 7x8 hours, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	LRR
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 - 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of BATH COUNTY GEN for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	GHE
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of COOK26 KVCK1 for all On-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

PJM DEK Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion PJM DEK, Day Ahead
Contract Code	HQV
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of DEK for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

PJM DOM RESID AGG Monthly Day Ahead On-Peak Energy + Congestion **Contract**

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion PJM DOM_RESID_AGG, Day Ahead
Contract Code	LGS
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of DOM_RESID_AGG for all On-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _FTR, e.g, the congestion components of contracts on JCPL_RESID_AGG would settle against price for JCPL_RESID_AGG_FTR on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.
Position Limit	https://www.nodalexchange.com/files/autogenerated/Nodal_Rulebook_Appendix_C-Limits_and_Levels.PDF

NODAL EXCHANGE CONTRACT SPECIFICATIONS

PJM DPL RESID AGG Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion PJM DPL_RESID_AGG, Day Ahead
Contract Code	LGY
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of DPL_RESID_AGG for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _FTR, e.g, the congestion components of contracts on JCPL_RESID_AGG would settle against price for JCPL_RESID_AGG_FTR on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of 7x8 hours within the month traded. For example, in a month with 248 7x8 hours, the Contract Size equals 248 MWh. The definition of 7x8 hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Sunday through Saturday, EPT.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of DUQ for all 7x8 hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _ZONE, e.g, the congestion components of contracts on JCPL would settle against price for JCPL_ZONE on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of 2x16 hours within the month traded. For example, in a month with 144 2x16 hours, the Contract Size equals 144 MWh. The definition of 2x16 hours is Hour Ending (HE) 0800 – 2300, Sunday, Saturday, and all NERC holidays, EPT.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of FE OHIO for all 2x16 hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _ZONE, e.g, the congestion components of contracts on JCPL would settle against price for JCPL_ZONE on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

PJM LEMOYNE218 KVUN1 Monthly Day Ahead Off-Peak Power Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Power, PJM LEMOYNE218 KVUN1, Day Ahead
Contract Code	LRH
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 - 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all Off-Peak hours, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of METED_RESID_AGG for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _FTR, e.g, the congestion components of contracts on JCPL_RESID_AGG would settle against price for JCPL_RESID_AGG_FTR on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

PJM PECO RESID AGG Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion PJM PECO_RESID_AGG, Day Ahead
Contract Code	LHW
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of PECO_RESID_AGG for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _FTR, e.g, the congestion components of contracts on JCPL_RESID_AGG would settle against price for JCPL_RESID_AGG_FTR on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of PEPCO for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _ZONE, e.g, the congestion components of contracts on JCPL would settle against price for JCPL_ZONE on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of PEPCO SMECO for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

PJM PSEG Monthly Day Ahead On-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion PJM PSEG, Day Ahead
Contract Code	GGG
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of PSEG for all On-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/mnt_ftr_zonal_lmps (Zone references on this site are listed as _ZONE, e.g, the congestion components of contracts on JCPL would settle against price for JCPL_ZONE on this site).
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of 2x16 hours within the month traded. For example, in a month with 144 2x16 hours, the Contract Size equals 144 MWh. The definition of 2x16 hours is Hour Ending (HE) 0800 – 2300, Sunday, Saturday, and all NERC holidays, EPT.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all 2x16 hours, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of SAFEHARB13 KVUNIT1 for all On-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	HJR
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of PJM WESTERN HUB plus the day-ahead hourly Congestion price of SPRINGDA18 KVCT3 for all Off-Peak hours in the contract month, published by PJM, at (or at successor location): https://dataminer2.pjm.com/feed/da_hrl_lmps .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of ASTORIA_EAST_ENERGY_CC1 for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NYISO BROOKLYN NAVY YARD Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion NYISO BROOKLYN_NAVY_YARD, Day Ahead
Contract Code	HAZ
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of BROOKLYN_NAVY_YARD for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of DANSKAMMER 4 for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of EMPIRE_CC_1 for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

NYISO GENESE Monthly Day Ahead On-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion NYISO GENESE, Day Ahead
Contract Code	HCE
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 – 2300 Monday through Friday, EPT, excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of GENESE for all On-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_zone.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_zone.csv .

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of HQ_GEN_CEDARS_PROXY for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of HUNTLEY 67 for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of KINTIGH for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of NARROWS_GT1_1 for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 27 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of NYISO WEST minus the day-ahead hourly Congestion price of NYPA HOLTSVILL for all Off-Peak hours in the contract month. Energy price of NYISO.WEST is defined as its LBMP minus Loss plus Congestion, published by NYISO, at (or at successor location): <a href="http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv">http://mis.nyiso.com/public/csv/damlbmp/<yyyymmdd>damlbmp_gen.csv .
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.
