Contract Description	Monthly Cash Settled Financial On-Peak Power, ISONE UN.KIBBY 34.5KIBY, Day Ahead
Contract Code	LVA
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 332 On-Peak hours, the Contract Size equals 332 MWh. The definition of On-Peak hours is Hour Ending (HE) 0800 - 2300 Monday through Friday, Eastern Prevailing Time (EPT), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 49 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all On-Peak hours, published by ISONE, at (or at successor location): https://www.iso-ne.com/isoexpress/web/reports/pricing/-/tree/lmps-da-hourly .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	LJP
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0700 and HE 2400, Monday through Friday, EPT and all hours for Saturday, Sunday, and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 18 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all Off-Peak hours, published by ISONE, at (or at successor location): https://www.iso-ne.com/isoexpress/web/reports/pricing/-/tree/lmps-da-hourly .
Final Settlement Day	The Final Settlement Day is the third Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	FOW
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 332 On-Peak hours, the Contract Size equals 332 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Saturday, Pacific Prevailing Time (PPT), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly LMP for all On-Peak hours, published by CAISO, at (or at successor location): http://oasis.caiso.com/mrioasis/logon.do , under the headings "Prices > Energy Prices > Locational Marginal Prices > Market = DAM".
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

CAISO IMPRLVLY 2 B2 Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion CAISO IMPRLVLY_2_B2, Day Ahead
Contract Code	HLN
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0600 and HE 2300 – 2400, Monday through Saturday, PPT and all hours for Sunday and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 14 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of CAISO SP15 plus the day-ahead hourly Congestion price of IMPRLVLY_2_B2 for all Off-Peak hours in the contract month, published by CAISO, at (or at successor location): http://oasis.caiso.com/mrioasis/logon.do , under the headings "Prices > Energy Prices > Locational Marginal Prices > Market = DAM".
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

CAISO POD MOSSLD 2 PSP2-APND Monthly Day Ahead On-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion CAISO POD_MOSSLD_2_PSP2-APND, Day Ahead
Contract Code	HMI
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Saturday, Pacific Prevailing Time (PPT), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 14 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of CAISO SP15 plus the day-ahead hourly Congestion price of POD_MOSSLD_2_PSP2-APND for all On-Peak hours in the contract month, published by CAISO, at (or at successor location): http://oasis.caiso.com/mrioasis/logon.do , under the headings "Prices > Energy Prices > Locational Marginal Prices > Market = DAM".
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0600 and HE 2300 – 2400, Monday through Saturday, PPT and all hours for Sunday and all NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 14 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of CAISO SP15 plus the day-ahead hourly Congestion price of VINCENT_5_B2 for all Off-Peak hours in the contract month, published by CAISO, at (or at successor location): http://oasis.caiso.com/mrioasis/logon.do , under the headings "Prices > Energy Prices > Locational Marginal Prices > Market = DAM".
Final Settlement Day	The Final Settlement Day is the fourth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

ERCOT LEG LEG G2 Monthly Real Time On-Peak Power Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Power, ERCOT LEG_LEG_G2, Real Time
Contract Code	HUI
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 332 On-Peak hours, the Contract Size equals 332 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Friday, Central Prevailing Time (CPT), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	The first business day of the month following the contract period
Contract Series	Up to 13 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Real Time hourly 15-minute Settlement Point Prices for all On-Peak hours, published by ERCOT, at (or at successor location): https://www.ercot.com/mp/data-products/data-product-details?id=NP6-905-CD . ERCOT correction prices are found at a different location, currently posted at: https://www.ercot.com/mp/data-products/data-product-details?id=NP4-197-M .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of 2x16 hours within the month traded. For example, in a month with 144 2x16 hours, the Contract Size equals 144 MWh. The definition of 2x16 hours is Hour Ending (HE) 0700 – 2200, Sunday, Saturday, and all NERC holidays, CPT.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly Settlement Point Prices for all On- Peak hours, published by ERCOT, at (or at successor location): https://www.ercot.com/content/cdr/html/dam_spp.html . ERCOT correction prices are found at a different location, currently posted at: https://www.ercot.com/mp/data-products/data-product-details?id=NP4-196-M .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

ERCOT SSPURT WIND1 Monthly Real Time On-Peak Power Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Power, ERCOT SSPURT_WIND1, Real Time
Contract Code	LOW
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 332 On-Peak hours, the Contract Size equals 332 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Friday, Central Prevailing Time (CPT), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	The first business day of the month following the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Real Time hourly 15-minute Settlement Point Prices for all On-Peak hours, published by ERCOT, at (or at successor location): https://www.ercot.com/mp/data-products/data-product-details?id=NP6-905-CD . ERCOT correction prices are found at a different location, currently posted at: https://www.ercot.com/mp/data-products/data-product-details?id=NP4-197-M .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of 7x8 hours within the month traded. For example, in a month with 248 7x8 hours, the Contract Size equals 248 MWh. The definition of 7x8 hours is Hour Ending (HE) 0100 – 0600 and HE 2300 – 2400, Sunday through Saturday, CPT.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	The first business day of the month following the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Real Time hourly 15-minute Settlement Point Prices for all On-Peak hours, published by ERCOT, at (or at successor location): https://www.ercot.com/mp/data-products/data-product-details?id=NP6-905-CD . ERCOT correction prices are found at a different location, currently posted at: https://www.ercot.com/mp/data-products/data-product-details?id=NP4-197-M .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Contract Code	GOU
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Friday, Eastern Standard Time (EST), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 18 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of MISO_RTO INDIANA HUB plus the day- ahead hourly Congestion price of ALTW.ALTW for all On-Peak hours in the contract month. Energy price of MISO_RTO.INDIANA HUB is defined as its Ex Post LMP minus Loss minus Congestion, published by MISO, at (or at successor location): <a href="https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv">https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

MISO_RTO AMIL.WPSE Monthly Day Ahead On-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion MISO_RTO AMIL.WPSE, Day Ahead
Contract Code	GPG
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Friday, Eastern Standard Time (EST), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 18 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of MISO_RTO INDIANA HUB plus the day- ahead hourly Congestion price of AMIL.WPSE for all On-Peak hours in the contract month. Energy price of MISO_RTO.INDIANA HUB is defined as its Ex Post LMP minus Loss minus Congestion, published by MISO, at (or at successor location): <a href="https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv">https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

MISO_RTO AMMO.SIOUX1 Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion MISO_RTO AMMO.SIOUX1, Day Ahead
Contract Code	GYT
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0600 and HE 2300 – 2400, Monday through Friday, EST, and all hours for Saturday, Sunday, and all NERC Holidays. No hours will be added or subtracted due to DST adjustments.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 18 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of MISO_RTO INDIANA HUB plus the day- ahead hourly Congestion price of AMMO.SIOUX1 for all Off-Peak hours in the contract month. Energy price of MISO_RTO.INDIANA HUB is defined as its Ex Post LMP minus Loss minus Congestion, published by MISO, at (or at successor location): <a href="https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv">https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

MISO RTO MEC.MECB Monthly Day Ahead Off-Peak Power Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Power, MISO_RTO MEC.MECB, Day Ahead
Contract Code	FLV
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0600 and HE 2300 – 2400, Monday through Friday, EST, and all hours for Saturday, Sunday, and all NERC Holidays. No hours will be added or subtracted due to DST adjustments.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 69 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the Day Ahead hourly Ex Post LMP for all Off-Peak hours, published by MISO, at (or at successor location): <a href="https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_imp.csv">https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_imp.csv .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

NODAL EXCHANGE CONTRACT SPECIFICATIONS

MISO_RTO SIPC.MARI69 Monthly Day Ahead Off-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial Off-Peak Energy + Congestion MISO_RTO SIPC.MARI69, Day Ahead
Contract Code	GQT
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of Off-Peak hours within the month traded. For example, in a month with 400 Off-Peak hours, the Contract Size equals 400 MWh. The definition of Off-Peak hours is Hour Ending (HE) 0100 – 0600 and HE 2300 – 2400, Monday through Friday, EST, and all hours for Saturday, Sunday, and all NERC Holidays. No hours will be added or subtracted due to DST adjustments.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 18 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of MISO_RTO INDIANA HUB plus the day- ahead hourly Congestion price of SIPC.MARI69 for all Off-Peak hours in the contract month. Energy price of MISO_RTO.INDIANA HUB is defined as its Ex Post LMP minus Loss minus Congestion, published by MISO, at (or at successor location): <a href="https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv">https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv .

MISO RTO WEC.PTBHGB1 Monthly Day Ahead On-Peak Energy + Congestion Contract

ITEM	SPECIFICATION
Contract Description	Monthly Cash Settled Financial On-Peak Energy + Congestion MISO_RTO WEC.PTBHGB1, Day Ahead
Contract Code	GNQ
Settlement Method	Financial
Unit of Trading	1 contract, based on 1 MW for each hour of the contract
Contract Size	1MW, with variable underlying megawatt hour (MWh). The Contract Size equals 1 MW multiplied by the number of On-Peak hours within the month traded. For example, in a month with 336 On-Peak hours, the Contract Size equals 336 MWh. The definition of On-Peak hours is Hour Ending (HE) 0700 – 2200 Monday through Friday, Eastern Standard Time (EST), excluding NERC Holidays.
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.0001 per MWh; Nodal T7: \$0.05 per MWh; Nodal LiveTrade: \$0.0001 per MWh
Settlement Price Precision	\$0.0001 per MWh
Last Trading Day	Last business day of the contract period
Contract Series	Up to 18 months
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The final settlement price will be determined by the Exchange at 3:15 pm EPT (absent operational delays) on the Final Settlement Day. The final settlement price is the average of the day-ahead hourly Energy of MISO_RTO INDIANA HUB plus the day- ahead hourly Congestion price of WEC.PTBHGB1 for all On-Peak hours in the contract month. Energy price of MISO_RTO.INDIANA HUB is defined as its Ex Post LMP minus Loss minus Congestion, published by MISO, at (or at successor location): <a href="https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv">https://docs.misoenergy.org/marketreports/<yyyymmdd>_da_expost_lmp.csv .
Final Settlement Day	The Final Settlement Day is the sixth Business Day following the last calendar day of the month, with payment settled on the next Clearing House business day, as defined by the Clearing House Rules, following the Final Settlement Day.

Settlement Price Precision	\$0.01 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries listed for Jan, Feb, Apr, May, Jul, Aug, Oct, and Nov beginning with Jul of the vintage year through May of the year two years following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	Massachusetts Class 1 RECs eligible for delivery are those representing Class 1 renewable energy (defined in Massachusetts General Law c.25A, 11F(c)) eligible to meet the Class I requirement of the Renewable Energy Portfolio Standard promulgated under Massachusetts General Law c.25A 11F and issued by NEPOOL GIS having a vintage or energy year designation that corresponds to the specified vintage of the expiring contract.
Registry	New England Power Pool Generation Information System (NEPOOL GIS)
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The Daily Settlement Price on the Last Trading Day
Delivery	On the Last Trading Day, the Exchange will provide the Clearing House with information identifying the Participants with delivery obligations for the purpose of issuing Tender and invoice notices in accordance with Section IX (Physical Settlement and Delivery) of the Nodal Clear Rulebook.
Final Settlement Day	The Final Settlement Day is the third Business Day after the Last Trading Day, with payment settled on the same day or the next Clearing House business day, as defined by the Clearing House Rules, following the successful delivery of the underlying instruments (if the delivery confirmation is available by 11:45am (EPT) on the third Clearing House business day after the Last Trading Day, the payment will be made on the same day during the Midday Margin Cycle; if it is available after 11:45am (EPT), the payment will be made on the next Margin Cycle which will be the next Clearing House business day)

Contract Size	100 MWh representing 100 qualifying Tier 1 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.01 per MWh; Nodal T7: \$0.01 per MWh
Settlement Price Precision	\$0.01 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly contracts for February of the year following the vintage year, plus one additional February. The exchange may list any other calendar month contract set off the standard listing cycle for up to 10 years.
Deliverable Product	Maryland Tier 1 RECs eligible for delivery are those which are eligible to meet the Tier 1 renewable energy source requirement (as defined in the Maryland Renewable Energy Portfolio Standard promulgated under §§ 7-701 et seq of the Public Utilities Article of the Annotated Code of Maryland) and issued by PJM GATS having a vintage or energy year designation that corresponds to the specified vintage of the expiring contract or any prior vintage year that is bankable and can be used for compliance in the specified vintage year without limitation at the time of physical delivery. RECs originating from "black liquor" or any "product derived from black liquor," as such terms are used in the Maryland Renewable Energy Portfolio Standard, are not deliverable.
Registry	PJM-EIS Generation Attribute Tracking System (PJM GATS)
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The Daily Settlement Price on the Last Trading Day
Delivery	On the Last Trading Day, the Exchange will provide the Clearing House with information identifying the Participants with delivery obligations for the purpose of issuing Tender and invoice notices in accordance with Section IX (Physical Settlement and Delivery) of the Nodal Clear Rulebook.
Final Settlement Day	The Final Settlement Day is the third Business Day after the Last Trading Day, with payment settled on the same day or the next Clearing House business day, as defined by the Clearing House Rules, following the successful delivery of the underlying instruments (if the delivery confirmation is available by 11:45am (EPT) on the third Clearing House business day after the Last Trading Day, the payment will be

NODAL EXCHANGE CONTRACT SPECIFICATIONS

M-RETS Renewable Energy Certificates from CRS-Listed Canadian Sited Wind Energy Facilities - Vintage 2023 Back Half Future

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities located in Canada which are listed with the Center for Resource Solutions (CRS) as an element of CRS's administration of its Green-e® certification program.
Contract Code	MLG
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Dec of the vintage year through Dec of the year following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in Canada that have an active Tracking Attestation form on file with the Center for Resource Solutions ("CRS-Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Back Half or BH, RECs acceptable for delivery are those that were issued for generation occurring in the last six calendar months of the specified vintage year. RECs must be delivered from a facility meeting the New Date requirements for the year of generation and the following year. New Date requirements are specified on www.green-e.org for CRS-Listed Facilities.</p>
Registry	Midwest Renewable Energy Tracking System (M-RETS®)
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate

NODAL EXCHANGE CONTRACT SPECIFICATIONS

M-RETS Renewable Energy Certificates from CRS-Listed Canadian Sited Wind Energy Facilities - Vintage 2024 Back Half Future

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities located in Canada which are listed with the Center for Resource Solutions (CRS) as an element of CRS's administration of its Green-e® certification program.
Contract Code	MLH
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Dec of the vintage year through Dec of the year following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in Canada that have an active Tracking Attestation form on file with the Center for Resource Solutions ("CRS-Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Back Half or BH, RECs acceptable for delivery are those that were issued for generation occurring in the last six calendar months of the specified vintage year. RECs must be delivered from a facility meeting the New Date requirements for the year of generation and the following year. New Date requirements are specified on www.green-e.org for CRS-Listed Facilities.</p>

NODAL EXCHANGE CONTRACT SPECIFICATIONS

M-RETS Renewable Energy Certificates from CRS-Listed Canadian Sited Wind Energy Facilities - Vintage 2033 Back Half Future

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities located in Canada which are listed with the Center for Resource Solutions (CRS) as an element of CRS's administration of its Green-e® certification program.
Contract Code	MLS
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Dec of the vintage year through Dec of the year following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in Canada that have an active Tracking Attestation form on file with the Center for Resource Solutions ("CRS-Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Back Half or BH, RECs acceptable for delivery are those that were issued for generation occurring in the last six calendar months of the specified vintage year. RECs must be delivered from a facility meeting the New Date requirements for the year of generation and the following year. New Date requirements are specified on www.green-e.org for CRS-Listed Facilities.</p>
Registry	Midwest Renewable Energy Tracking System (M-RETS®)
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate

Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in Canada that have an active Tracking Attestation form on file with the Center for Resource Solutions ("CRS-Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Front Half or FH, RECs acceptable for delivery are those that were issued for generation occurring in the first six calendar months of the specified vintage year.</p>

NODAL EXCHANGE CONTRACT SPECIFICATIONS

M-RETS Renewable Energy Certificates from CRS-Listed Canadian Sited Wind Energy Facilities - Vintage 2035 Front Half Future

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities located in Canada which are listed with the Center for Resource Solutions (CRS) as an element of CRS's administration of its Green-e® certification program.
Contract Code	MOU
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Dec of the vintage year through Dec of the year following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in Canada that have an active Tracking Attestation form on file with the Center for Resource Solutions ("CRS-Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Front Half or FH, RECs acceptable for delivery are those that were issued for generation occurring in the first six calendar months of the specified vintage year.</p>
Registry	Midwest Renewable Energy Tracking System (M-RETS®)
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The Daily Settlement Price on the Last Trading Day
Delivery	On the Last Trading Day, the Exchange will provide the Clearing House with information identifying the Participants with delivery obligations for the purpose of

M-RETS Registered Renewable Energy Certificates from CRS Listed Wind Energy Facilities - Vintage 2023 Front Half Future

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities which are listed with the Center for Resource Solutions (CRS) as an element of CRS' administration of its Green-e® certification program.
Contract Code	MWD
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Apr of the vintage year through Mar of the year two years following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in the 50 U.S. states that have a Tracking Attestation form on file with the Center for Resource Solutions ("CRS Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Front Half or FH, RECs acceptable for delivery are those that were issued for generation occurring in the first six calendar months of the specified vintage year.</p>

M-RETS Registered Renewable Energy Certificates from CRS Listed Wind Energy Facilities - Vintage 2025 Front Half Future

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities which are listed with the Center for Resource Solutions (CRS) as an element of CRS' administration of its Green-e® certification program.
Contract Code	MWF
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Apr of the vintage year through Mar of the year two years following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in the 50 U.S. states that have a Tracking Attestation form on file with the Center for Resource Solutions ("CRS Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Front Half or FH, RECs acceptable for delivery are those that were issued for generation occurring in the first six calendar months of the specified vintage year.</p>

M-RETS Renewable Energy Certificate from CRS Listed Wind Energy Facilities **Vintage 2026 Back Half Future**

ITEM	SPECIFICATION
Contract Description	Physically delivered Renewable Energy Certificates (REC) issued by the Midwest Renewable Energy Tracking System (M-RETS®) for qualifying wind energy production from facilities which are listed with the Center for Resource Solutions (CRS) as an element of CRS' administration of its Green-e® certification program.
Contract Code	MXG
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 MWh representing 1,000 RECs
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.001 per MWh; Nodal T7: \$0.001 per MWh
Settlement Price Precision	\$0.001 per MWh
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expiries beginning with Sep of the vintage year through Mar of the year two years following the vintage year. The Exchange may list any other calendar month expiry set off the standard listing cycle for up to 10 years.
Deliverable Product	<p>RECs delivered must be issued by and delivered within M-RETS® for qualifying wind energy production from facilities located in the 50 U.S. states that have an active Tracking Attestation form on file with the Center for Resource Solutions ("CRS Listed") in connection with CRS's administration of its Green-e® certification programs. The Tracking Attestation form must cover the generation period of the RECs. Maintenance of an active Tracking Attestation form does not guarantee that a facility meets the requirements of any Green-e® renewable energy standards and does not mean that a facility's supply is Green-e® Certified. For more information about Tracking Attestation forms and Green-e® certification, please visit the Green-e® website at www.green-e.org. To confirm that a facility has an active Tracking Attestation form on file, please contact the Center for Resource Solutions at verification@green-e.org.</p> <p>For contracts which are designated as Back Half or BH, RECs acceptable for delivery are those that were issued for generation occurring in the last six calendar months of the specified vintage year. RECs must be delivered from a facility meeting the New Date requirements for the year of generation and the following year. New Date requirements are specified on www.green-e.org for CRS Listed Facilities.</p>
Registry	Midwest Renewable Energy Tracking System (M-RETS)
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The Daily Settlement Price on the Last Trading Day

NODAL EXCHANGE CONTRACT SPECIFICATIONS

ITEM	SPECIFICATION
Delivery	On the Last Trading Day, the Exchange will provide the Clearing House with information identifying the Participants with delivery obligations for the purpose of issuing Tender and invoice notices in accordance with Section IX (Physical Settlement and Delivery) of the Nodal Clear Rulebook.
Final Settlement Day	The Final Settlement Day is the third Business Day after the Last Trading Day, with payment settled on the same day or the next Clearing House business day, as defined by the Clearing House Rules, following the successful delivery of the underlying instruments (if the delivery confirmation is available by 11:45am (EPT) on the third Clearing House business day after the Last Trading Day, the payment will be made on the same day during the Midday Margin Cycle; if it is available after 11:45am (EPT), the payment will be made on the next Margin Cycle which will be the next Clearing House business day)

Contract Description	Physically delivered verified emission reductions (VERs or Offsets) from nature-based projects eligible under the rules of the Verra Climate, Community and Biodiversity Standards (CCB) Gold certification, where an offset is an electronic certificate registered in the Verra registry.
Contract Code	NAF
Settlement Method	Physical Delivery
Unit of Trading	1 contract
Contract Size	1,000 Metric Tons (MTs) representing 1,000 Offsets
Currency	US Dollars
Minimum Price Fluctuation	Block: \$0.01 per MT; Nodal T7: \$0.01 per MT
Settlement Price Precision	\$0.01 per MT
Last Trading Day	Three Business Days prior to the last Business Day of the delivery month. For December expiries, Last Trading Day is the fourth Business Day prior to the last Business Day of the delivery month, unless otherwise specified by the Exchange.
Delivery Day	Three Business Days after the Last Trading Day
Contract Series	Monthly expirations for 2022 and the following two years. Annual December contracts for up to an additional 7 years. The exchange may list any other calendar month contract set off the standard listing cycle.
Deliverable Product	Physically delivered verified emission reductions (VERs or Offsets) which satisfy Verra's nature-based project protocols and the Climate, Community and Biodiversity Standard (CCB). Acceptable offsets must satisfy at least one of the Gold Level criteria of the CCBA standards checklist: GL1- Climate Change Adaptation Benefits, GL2- Exceptional Community Benefits, or GL3- Exceptional Biodiversity Benefits. Eligible vintages for delivery are those of the stated vintage and later. Where an offset vintage period spans more than one calendar year, the vintage of the offset is defined by the start year of the vintage period.
Registry	Verra Registry
Daily Settlement Price	Determined by the Exchange based on exchange activity, other market data, and extrapolation to traded contracts, as appropriate
Final Settlement Price	The Daily Settlement Price on the Last Trading Day
Delivery	On the Last Trading Day, the Exchange will provide the Clearing House with information identifying the Participants with delivery obligations for the purpose of issuing Tender and invoice notices in accordance with Section IX (Physical Settlement and Delivery) of the Nodal Clear Rulebook.
Final Settlement Day	The Final Settlement Day is the third Business Day after the Last Trading Day, with payment settled on the same day or the next Clearing House business day, as defined by the Clearing House Rules, following the successful delivery of the underlying instruments (if the delivery confirmation is available by 11:45am (EPT) on the third Clearing House business day after the Last Trading Day, the payment will be made on the same day during the Midday Margin Cycle; if it is available after 11:45am (EPT), the payment will be made on the next Margin Cycle which will be the next Clearing House business day)
